The most important thing we build is trust

EXPLORER 3075

This Manual Fly-Away system provides users with a lightweight, ruggedized, and modular mobile terminal capable of Ku- and Ka-band operation. Its ease of use allows for operators with minimal satellite experience to access any broadband application within minutes.

Versatile system

EXPLORER 3075 can be used on Ku-band networks and for NewsSpotter services on KA-SAT. By simply switching the feed assembly and modem, EXPLORER 3075 can be transformed into an Inmarsat GX terminal. The tripod, the manual panning head and the reflector panels are shared components.

Reliable EXPLORER

EXPLORER 3075 is developed completely in-house by Cobham SATCOM. It features genuine EXPLORER design, which is already established and proven with Cobham SATCOM's highly regarded EXPLORER BGAN and VSAT terminals. Its unique design and system versatility ensures high-quality connectivity, which means you can count on EXPLORER 3075 to provide you with vital communication whatever the conditions.
